**Description**

Request for better default icons. I know that its possible to add custom icons now, but it makes kdb file bigger. So I was wondering if you guys can add "FamFamFam" [http://www.famfamfam.com/](http://www.famfamfam.com/) icons by default. Thank you!

**History**

#1 - 09/29/2013 05:12 PM - Felix Geyer

Can you provide some examples of current and FamFamFam icons you want to have replaced?

#2 - 12/25/2013 10:53 AM - Samir Nassar

Replace C00_Password.png with [http://fontawesome.io/icon/key/](http://fontawesome.io/icon/key/)

Please don't spam the bug tracker. You can write multiple sentences in a single comment.
While the existing icons are not very coherent, making some of them monochromic would be even less so.

#52 - 12/25/2013 05:36 PM - Samir Nassar
Apologies. Not intended to spam the tracker. I find it easier to have the references separated. I'll glob in the future.

i think monochrome icons in a desktop-application don't look nice.

to have a coherent icon-set we should use one like FAMFAMFAM Silk.
but not all are needed. don't know if something is missing.

- Status changed from New to Rejected

Closing for now.
Using the same icon set as KeePass ensure a coherent experience across KeePass implementations.
On top of that I haven't seen an icon set that provides the necessary icons and is of considerably better quality.
